Your Dream is OUR Dream

Do you suppress your dream realistic?

You had dreamed bigger, right?

I handle current tasks steps to your ordinally dream.

Not contract. Not alternate. I'm a buddy!

As a buddy, I'll build something better by sharing and discussing the situation.
I don't simply make what you told,
nor do I change your idea to product based on my philosophy.
I Aim to DIG deep, reveal the essence of each idea,
and challenge common assumptions.
I'm going to create something unique to each project.

EMPOWER

I create an environment where people succeed on their own.

For Clients — For Recruiters

You will be able to build yourself.

I work WITH YOU to go on your own, not just build product you told.

I give you:

Building environment
Development skills
How to release
Security advises
parmanent support after launch, etc.

case study : App development -V EFFECT

EMPOWER

I create an environment where people succeed on their own.

For Clients — For Recruiters

1. Find Clarity:

I define the goal, choose the right approach, identify bottlenecks,
research the market. Then, I build the first hypothesis.
I generate original ideas.

2. Design to Learn

In a VUCA world, LEARNING is the only part of the cycle that compound over time.

3. Enable

I desing projects that run on the own to free up time resources. I'll work across multiple projects with the asset "Learning".

case study : App development -V EFFECT

taVNS -the main theme I study in Lab

Overview

A non-invasive neuromodulation is a technology that controls physiological functions by stimulating through skin. Our team aims to improve Q. O. L. with the technology.

MY ROLE

Measuring and analysing physiological internal states that cannot be seen directly.
Then, interpret them from an enginnering . perspective.

Original papers: TBD (under review)

V EFFECT -an app development, case of I empower a developer

Overview

V EFFECT is a new kind of social app that focused on habits. It uses "Winner Effect", where a small win encourage the next win. It's available on App store and on the web.

MY ROLE

I set up the initial development emvironment and supported a friend with no dev experience, introducing Git and AI tools and helping launch it. Now, he leads development and operations, while I advise on security, tech issues, and do case research.

sending box

Let's DIG with me

For clients — For recruiters

Thank you for your interst in me.
I'm currently looking for my first full-time position.

Available from:
April 2029

Employment:
Full-time

Location:
Japan - nationwide
On-site / Hybrid / Remote

International:
Open to international opportunities
English communication possible: text-based preferred.

I'm interested in:
Occupations: Research Enginner / Technical Project Manager / R&D
Fields: Healthcare / Medical Technology / others

By working across multiple projects,
I hope to draw on that interdisciplinary experience
to create entirely new inventions that will bring happiness to humanity.

I look forward to hearing from you.
Best regards,

Yusuke Katahara
